

The “dislo-principle“

dislo has all the necessary tools to maximize profitability and efficiency while keeping all your data and information in one secure place.

All payment requirements are covered with an easy integration, ensuring economic success.

dislo is already being used by the leading European subscription-based e-Commerce sites and scales without limit.

Your Features

Scales up to millions of worldwide users and suits all project sizes from startup to enterprise.

Highest security standards are guaranteed: 24/7 monitoring; hourly backups; efficient fraud prevention system (e.g. chargeback fraud); PCI Compliance with highly granulated roles and access permissions.

With the IXOPAY gateway, dislo gives access to many credit card acquirers and more than 200 alternative payment options in over 50 countries, ensuring familiar options for customers.

Vaulting credit card data in a PCI level 1 certified environment is included, so you'll always own your subscriptions.

dislo's recurring billing capabilities have an easy and flexible subscription set-up; it supports free and paid trials and creates various subscription periods with pause, prolong and prorate options ensuring maximum customer retention.

dislo allows for plans with various up-and downgrade strategies, different signup flows, customized coupons, discounts, one-time charges, etc.

dislo is easy to integrate into existing frontends via the dislo public API. Alternatively, dislo's optional Frontend Application Server can quickly set up and adapt landing pages, bind them to specific traffic, plans, payment methods or territories.

dislo is integrated to many 3rd party services including: kissmetrics; mixpanel; Customer.io; Optimizely; MailChimp; PostAffiliate Pro, etc.
